H. Functions of Local CRCGs

- 1) The primary function of local CRCGs is to develop coordinated individual service plans for persons with complex needs agreed upon by members of the group and the persons served. Natural supports identified by the person should also be included in developing the coordinated individual service plans. A person, their family or caregiver may self-refer or make a referral to a local CRCG. Other community members may also make a referral.

- 3) When a local CRCG considers an out-of-home placement as the option of last resort and as the least restrictive setting appropriate for a child/youth, the group will engage in a permanency planning process that focuses on family support by facilitating a permanent living arrangement with the goal of reunification when appropriate, and with the primary feature being an enduring and nurturing family relationship. Similarly, when an out-of-home placement is considered as the option of last resort and as the least restrictive setting appropriate for an adult, the group will also engage in a planning process that facilitates an ongoing living arrangement that meets the adult's needs, goals, and independence.
- 4) CRCGs will seek to inform local system of care governance bodies on behavioral health trends, strengths, gaps, barriers and solutions. While systems of care traditionally serve children, youth, young adults, and families, the system of care values and principles may also be applied to adults.
